

CAPEX approval WF application in Bacardi

We've built a WF multi-application approval of CAPEX projects, from the request to the approval of the order, for more than 200 users in 17 countries. With these Fiori applications, BACARDI users will be able to configure their own configuration and approval screens in workflow processes, initiate applications and WF processes from Fiori applications, with different levels of approval based on volume, currency and country criteria. Document management imbued in the process, so that the necessary information reaches the right person at the time you need it. All this with a focus on maximizing the user experience.
